Very good game.. Do not buy this game. There is a reason the franchise stopped, this game.

4/10. Gameplay is fine, but playing this game on high-end graphics cards and/or multiple monitors seems to crash the game..

-the controls hardly work cannot play game

. annoyingly fun considering the game is just a bunch of simple sprites moving about a basic map.

it is surprisingly in depth and addictive in the pursuit of carrying on the generations of your beloved sprites and remarkably very few bugs.. The game has a lot of charm and is overall a fun puzzle game with an interesting plot, but sometimes the specific answers it wants (ie. what files it wants) feel unintuitive. Pick it up for like three bucks and you probably won't regret it..

Innovative at first,

slowly becomes a drag and torment

trying to solve the next puzzle.

Gave me migrant.

Playable.

Buy only if with discount or coupon.

If you want a game like this, go buy beat hazard. Difficult to follow enemys, clunky movement and just appalling graphics, looks like it was just made with some basic sprites.. Rating 2/5

Review can be found here: <http://greyreviews.livejournal.com/29312.html>. I got it for free with pre-order. Awesome pack and all 9 bucks is pushing it IMO tho for something that should've been in the base game, but if you're really into the game, buy it 100% buy it. If you just mess around with the game and don't play often, I would forget about it for now.

It is shady stuff to release day 1 DLC I need to say that. Stuff that is already done before you release a game, should be in the game, not charged extra. You already do not have that many leaders to start out with in the first place. This should've been in the game. F*** you guys for doing this.. +Pros

Looks great

Nice level variety

Different than other shoot em ups with some interesting ideas

Light RPG elements with an upgrade system

-Cons

Confusing (but you should figure things out after a while)

Lackluster music and sound effects

Destroying enemies lacks impact (just an explosion animation and the sprite is gone)

There is no infinite ammo of any weapon so you will have to stop shooting often

You will have to replay levels as you need a certain number of gold eggs to advance

You're a chicken

Bottom Line

I played for about 25 minutes and got through four levels before I was faced with the fact that I had to replay the previous ones to collect golden eggs to unlock another level. Not to mention the third and fourth levels just kind of ended abruptly, I thought I failed the missions.

If you love high adrenaline shoot em ups and have a 360, check out Strania instead. Or Einhander on the PS1. Or even either of the Geometry Wars. Not so much this. It's not bad but it's not good either.. Unique and cool game. Never seen anything like it. It is interesting and fun. 10/10. this game is very fun and addictive but the only downside is it crashes alot and having alot of error , armor games if you are looking at this do fix the game before publishing .. 1. where is the flash light

2. how do i get a gun

thats what i dislike but it looks pretty good,

i really hope the creators update it so i can have more fun

and i do recommend this game...

also in the tralier it's ment to be really good unless i have a bad version

-Say 5•9•7🍷♥. **Reopening Solo matchmaking on NA servers in a time-limited manner:**

Dear players,

It's been three weeks since the temporary shutdown of Solo and Duo matchmaking on NA server. First, we want to express our sincerest apologies to all the players affected by this change. Although this change was an emergency measure that we were forced to take, and it has shown to be effective, but we failed to communicate and inform you guys about this change beforehand, we also understand that directly shutting down matchmaking modes is only a temporary solution to this issue.

Therefore, we decided to reopen Solo matchmaking on NA in a time-limited manner. Here's the specific time period:

Every day at 7PM - 9PM Pacific Time (0200 - 0400 UTC). Ritual of the Moon:

Unfortunately the mac bugs were not fixed yesterday. However today they were. Rejoice!. **FTN Highlight: PvP 101 - Zone Map:**

Squad up and explore our PVP zones, or you can choose to avoid these areas and protect your shelters! Either way, you can check out this map highlighting our PvP and non PvP areas to help aid you in your survival!

Areas 1-4 (green) are PVE areas; Areas 5-9 (red) are PVP areas

Keep in mind that if you are killed in PvP areas by other players you risk dropping all of your items for other players to loot!

Another tip to keep in mind is you can not attack other players shelters and their generators directly in order to occupy their shelters. However, other survivors found success when utilizing zombies to attack other players defenses!

Have you already battled it out with other squads? Let us know your feedback on PvP experiences in the comments below!.

Update From Tölva - 50% Off Sale! Other Stuff!:

Hello there!

FIFTY PERCENT!. Update 12: Look and FPS options:

- static deathcams now follow faces instead
- jumping more realistic (no "air walking")
- options to limit frames per second for much better performance and consistency
- you can also adjust graphics quality in-game. use home / end, page up / down, on keyboard.
- option to set controller sensitivities
- changed joystick identifier to an image

Check if this is ok. We want to start adding new map types and game modes!. **Show Off Your Best Moment!:**

Steam Cloud Support!:

. CrossCode now with

Good news everyone: **We finally implemented support for Steam Cloud!**

That means that your CrossCode saves can now be backed up in the Cloud and shared for all CrossCode installations. It even should work cross platform. Hopefully.

If you don't want your saves to be synchronized, you can disable Steam Cloud for CrossCode. (Right click the game, select "Properties", then the "UPDATES" tab and uncheck "Enable Steam Cloud synchronization for CrossCode").

Important: Note that we don't support a proper **merging** of save states. That means if you have two different sets of saves on two machines and want to use Steam Cloud, you will have to replace one set of saves with the others. Steam should give you a warning in that case and an option to select which saves you want to keep.

If there are any issues with save synchronization, please let us now!

And that's all!
